CALCULATION OF GPA

GPA includes all numeric graded courses and is weighted.

Honors Courses [Calculus, Chemistry, Honors U.S. History, Honors (College) English, Advanced Geometry, Advanced Physics, Honors Algebra II, Honors Algebra I, and Honors Physical Science] and Advanced Placement courses (online through VLN) are weighted on a 5.0 scale to determine class rank, Valedictorian and Salutatorian status.

Weighted courses are calculated on a 5.0 scale (add 1.0 to the grade point value for the grade received). For instance, a student who receives a 99 or 100 in a weighted class would receive a grade point value of 5.0 (4.0 + 1.0). A student who receives an 88 in a weighted class would receive a grade point value of 4.2 (3.2 + 1.0).

<u>Grade</u>	<u>Grade Point Value</u>
99-100 (A+; Superior)	4.0
96-98 (A; Excellent)	3.8
94-95 (A-; Well Done)	3.6
91-93 (B+; Above Average)	3.4
88-90 (B; Above Average)	3.2
85-87 (B-; Above Average)	2.9
81-84 (C+; Average)	2.5
78-80 (C; Average)	2.1
75-77 (C-; Average)	1.8
71-74 (D+; Below Average)	1.5
68-70 (D; Below Average)	1.25
65-67 (D-; Below Average)	1.0
Below 65 (F; Failed)	0.0

GPA is calculated by Renweb and is included on the student transcript.

To determine GPA manually:

- 1) Multiply the Grade Point Value for each course by the number of credits for the course. For instance, a grade of 98 in a one-credit course would have a value of 3.8, and a grade of 98 in a course that is worth .2 credits would have a value of 0.76.
- 2) Add the credit values together.
- 3) Divide the total credit value by the total number of credits earned.

Example: A student has grades of 99, 98, 95, 94, 88, 80, and 85 in full-credit subjects and 100 and 96 in partial-credit (.2 credits each) subjects. The point values for the one-credit courses would be 4.0, 3.8, 3.6, 3.6, 3.2, 2.1 and 2.9. The point values for the .2-credit courses would be 0.8 and 0.76. Add the grade point values to get 24.76. Divide 24.76 by the 7.4 credits earned to get a GPA of 3.35.
